

Stock Medication Consent

The School District will supply generic ibuprofen and generic acetaminophen, antacids and benadryl for students in school. (Elementary schools will not provide stock Ibuprofen.)

Written permission is required for administration of any of these medications.

The School District personnel will only administer the recommended therapeutic dose of the non-prescription medication. For the safety of the student, a written request from the parent/guardian and licensed medical practitioner is required if the dose is other than the recommended therapeutic dose found on the package label.

Stock medications will not be given in combination with other non-prescription medications, e.g. cold medicines, as they may also contain acetaminophen or ibuprofen.

Only one dose of medication may be administered during the school day.

***Stock medications will not be administered for more than three days in a row or eight days per month without documentation from a medical practitioner.*

Medication will be administered by staff designated by the school nurse and principal. This request is in place for the current school year only.
